EXPERIENCE

Geekonomy Technology Pvt. Ltd.

Bengaluru

Full Stack Developer

Apr 2026 - Present

- Built and delivered 50+ UI screens across multiple web and SaaS projects using Next.js and TypeScript, working with existing components and project requirements.
- Implemented REST APIs across 20+ backend modules using NestJS, including DTO validation and Swagger documentation.
- Secured projects with JWT authentication and role-based access control, supporting multiple user roles and protected routes.
- Took responsibility for assigned tasks from requirement understanding through implementation, testing, debugging, and delivery, completing an average of 3–5 features and defect fixes per week across assigned projects.
- Worked on GitHub Actions CI/CD workflows and AWS EC2 deployments, including build, validation, server configuration, and Nginx setup as part of a 6–7 member Agile team.

Full Stack Developer Intern

Oct 2025 - Mar 2026

- Contributed to Bragi, a multi-tenant SaaS CRM and project-management product used by 20+ internal users, working with an ERD covering 54 tables and contributing to 3–5 database tables based on product requirements.
- Defined database relationships and connected entities with backend functionality, integrated REST APIs between frontend and backend, and investigated data-flow issues during development and QA testing.
- Tested and fixed frontend and backend issues using Linear and Jam, collaborating with QA engineers during Agile sprints to verify and deliver changes.

Deep Learning Research Intern

Oct 2024 - Nov 2024

DRDO - CABS

Bengaluru

- Worked on multiple stages of an aircraft detection system, including aerial image annotation, preprocessing, model training, and evaluation using CNN and Faster R-CNN architectures.
- Annotated and processed approximately 3,000 aerial images and achieved more than 95 percent validation accuracy during model evaluation.

PROJECTS

Client Websites (*React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Vercel*)

- Designed, developed, and deployed responsive client websites using React.js, Next.js and Angular based on project requirements. Built frontend components and interfaces using JavaScript/TypeScript, HTML5, CSS3, and Tailwind CSS, and handled testing, deployment, and subsequent updates across projects.
- Live sites: sridevielectricals.in, ddkinfracon.in

Full-Stack ERP For Father's Business (*React, TypeScript, Express, PostgreSQL, Drizzle ORM, Vite, Supabase, Render*)

- Digitized end-to-end business operations: from lead capture to invoicing and payment collection, replacing paper-based workflows across CRM, job scheduling, inventory, purchase orders, payroll, and finance modules into a single unified platform.
- Developed a Worker Portal with real-time sync using Server-Sent Events, allowing field technicians to update job status, log hours, and record material usage on-site, which removed the need for manual end-of-day reconciliation between office and field teams.
- Automated payroll by linking attendance records to salary computation, added role-based access for three user tiers, and built PDF invoice generation and a guided onboarding wizard to cut down repetitive admin work and speed up new staff ramp-up.
- Deployed the application to production on Render with Supabase as the managed PostgreSQL database, configured with SSL, connection pooling, and health-check monitoring to ensure reliable uptime.
- Live site: sridevielectricals.com.

Hermes: Scheduled Task Automation Service (*Cron, MCP, Telegram/Discord APIs*)

- Built an 8-job scheduled automation pipeline with independent workers and external messaging integrations.
- Defined each agent's behavior in a dedicated skill file, enabling scheduled autonomous execution on a fixed schedule without manual triggering.

EDUCATION

Global Academy of Technology

Dec 2021 - Jul 2025

B.E. in Computer Science & Engineering, Bengaluru, CGPA: 7.93

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Responsive UI

Backend & APIs: Node.js, Express.js, NestJS, REST APIs, JWT Authentication and RBAC, Swagger

Databases: PostgreSQL, TypeORM, MongoDB(basic)

DevOps & Cloud: Git, Docker, Vercel, AWS EC2(Basics)

Testing & Quality: API Testing, Responsive Testing, UI Testing, Integration Testing

Tools & Practices: Figma, Linear, Claude Code, Cursor, Agile

CERTIFICATIONS

- Prompt Design in Vertex AI, Google Cloud • Gemini for Application Developers, Google
- Gemini for end-to-end SDLC, Google • Java Basic, HackerRank
