Experience

Geekonomy Technology Pvt. Ltd. Bengaluru
Full Stack Developer *Apr 2026 – Present*

- Build and maintain UI screens for web and SaaS applications in Next.js and TypeScript, connecting them to backend APIs, reusing shared components and fixing reported defects day to day.
- Develop and maintain REST APIs in NestJS modules with DTO validation and Swagger documentation, and extend existing endpoints as requirements change.
- Secured applications with JWT authentication and role-based access control, covering multiple user roles and protected routes.
- Independently manage features end to end (requirements, implementation, testing, debugging, delivery), shipping 3–5 features and fixes per week and helping the 6–7 member Agile team deliver **10–15% faster**.
- Set up GitHub Actions CI/CD pipelines and AWS EC2 deployments, including build validation, server configuration and Nginx.

Full Stack Developer Intern Oct 2025 – Mar 2026

- Built backend features for **Bragi**, a multi-tenant SaaS CRM and project-management app used by 20+ internal users, on a relational schema of **54 tables**.
- Defined entity relationships, integrated frontend and backend REST APIs, and traced data-flow issues during development and QA.
- Fixed frontend and backend bugs tracked in Linear and Jam, working with QA engineers across Agile sprints.

Deep Learning Research Intern Oct 2024 – Nov 2024
DRDO – CABS *Bengaluru*

- Worked across an aircraft detection pipeline (annotation, preprocessing, training, evaluation) using CNN and Faster R-CNN; annotated and processed **∼3,000 aerial images** and reached **95%+ validation accuracy**.

Projects

Business Operations and ERP Platform | *React, TypeScript, Express, PostgreSQL, Drizzle ORM* sridevielectricals.com

- Digitized lead-to-invoice operations by replacing paper workflows with one platform covering CRM, job scheduling, inventory, purchase orders, payroll and finance.
- Built a Worker Portal with real-time sync via Server-Sent Events so field technicians update job status, hours and materials on site, removing manual end-of-day reconciliation.
- Automated payroll from attendance records, added role-based access for three user tiers, PDF invoice generation and a guided onboarding wizard.
- Deployed to production on Render with Supabase PostgreSQL (SSL, connection pooling, health-check monitoring).

Client Websites | *React.js, Next.js, Angular, Tailwind CSS, Vercel* sridevielectricals.in | ddkinfracon.in

- Designed, built and deployed responsive client websites with React.js, Next.js and Angular, and handled testing, deployment and ongoing updates.

Hermes: Scheduled Task Automation Service | *Cron, MCP, Telegram/Discord APIs*

- Built an 8-job scheduled automation pipeline with independent workers and Telegram/Discord messaging integrations; each agent's behavior is defined in a dedicated skill file so jobs run autonomously on a fixed schedule.

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, SQL
Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Responsive UI
Backend & APIs: Node.js, Express.js, NestJS, REST APIs, JWT Auth and RBAC, Swagger, Server-Sent Events
Databases: PostgreSQL, Drizzle ORM, TypeORM, Supabase, MongoDB (basic)
DevOps & Cloud: Git, Linux, GitHub Actions (CI/CD), Docker, Nginx, Vercel, Render, AWS EC2 (basics)
Testing: API, Integration, UI and Responsive Testing
Tools & Practices: Figma, Linear, Agile, AI-assisted development (Claude Code, Cursor)

Education

Global Academy of Technology Dec 2021 – Jul 2025
B.E. in Computer Science & Engineering, CGPA: 7.93 *Bengaluru*

Certifications and Coursework

Coursework: OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Certifications: Prompt Design in Vertex AI (Google Cloud) • Gemini for Application Developers (Google) • Java Basic (HackerRank)
